Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 5, 11, 13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ogiso (US 6519933) in view of Geasseler (US 2004/0173170). Ogiso discloses a variable valve control apparatus with a means for calculating an amount of fresh air flown into a cylinder of an engine and a means for calculating a gas amount passing into the cylinder. However, Ogiso does not show the use of a means for calculating a gas amount spit back to an intake side from the cylinder. Geasseler shows that the provision of a means for calculating the amount of a residual amount of gas inside of a cylinder is old and well known in the art. Since the prior art references art from the same field of endeavor, the purpose disclosed by Geasseler would have been recognized in the pertinent art of Ogiso. Therefore, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to provide the device of Ogiso with a means for calculating the residual value inside of the cylinder as taught by Geasseler.

Allowable Subject Matter

Claims 2-4 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
